

Sustainability in the Automotive Supply Chain

RSCI

Responsible Supply
Chain Initiative

The Industry Standard for sustainable supply chains

RSCI | Responsible Supply Chain Initiative

What is RSCI?

- ✓ RSCI is a **sustainability initiative of the automotive industry**.
- ✓ RSCI offers companies a **standardized audit program to assess social and environmental risks** in the automotive supply chain.

2021

RSCI was founded under the umbrella of the VDA in Berlin

27 Members

including companies and associations, are organized within the RSCI

Sustainable supply chains are a key challenge for many companies

Current challenges

- **Customers and civil society demand sustainable supply chains**
- **Legal requirements** at national and EU level require due diligence
- **Lack of comparability and transparency** makes supplier assessments difficult
- **High effort and repeated audits** for suppliers require significant time and financial resources
- **Lack of practical and scalable solutions** makes implementation difficult for small and medium-sized enterprises

RSCI supports companies in implementing due diligence obligations along global supply chains

Our solution

- ✓ RSCI **assesses social and environmental risks** through a **standardized audit program**
- ✓ RSCI supports **compliance with legal requirements** at national and European levels
- ✓ Standardized audits create **transparency and comparability**
- ✓ An IT platform enables shareable results and **avoids duplicate audits**
- ✓ **Specifically developed for the automotive industry**, with a focus on small and medium-sized enterprises
- ✓ **Strong network and support services** for members and suppliers
